

Milestone 1

CMPT 215

Due: July 6th, 2017

June 27, 2017

Total: 10

1 Description

Write a one page document explaining the program your team wishes to develop. You will need to provide enough detail so the marker can easily understand what you are trying to achieve and how it will show your ability to code in MIPS. It will also need to contain a list goals you will accomplish throughout the project and the dates the goals will be completed by. These goals will be used as a rubric for marking for the future milestones, so ensure they are feasible. Also, provide possible errors and risks you may encounter while doing this project that could prevent your team from succeeding and what you would do to overcome these hurdles. Add enough detail to fully explain yourself, but do not include arbitrary information or 'fluff'. You will be marked on content and language.

2 Submission

PDF document with your team name and svn log proving you have set it up. The document should contain:

- Team name
- Team members name and nsids
- Project name

- Project description
- Project goals
- Project risks
