Milestone 1

CMPT 215

July 2017

1 Team Name:

Hello 215

2 Team Members:

name: Hao Li NSID: hal356
name: Yinsheng Dong NSID: yid164
name: Zhihao Lin NSID: zhl798
name: Jinyang Liu NSID: jil167
name: Yanzhao Lu NSID: yal121

3 Project name:

Student information record system.

4 Project description:

A recording system use MIPS assembler. It can record students' information. System has some functions. For example, search and modify. May provide more functions in the future.

5 Project goals:

July 16: Decide functions in the system and give explanation.
July 19: List data and variables.
July 24: Implement functions for student information recording.
July 30: Implement functions for grade recording and average calculation.
August 2: Testing and debugging with data.
August 14: Final version.
August 14: Complete final report.

6 Project risks:

1. Our system do not have Encrypting system, which lead to many security issues.
2. If we search student information by name, we should consider same name problem, even they have different student number.
3. If we type symbols and number in name option, will case an error.
